01

BIO-BASED POLYOLS

Polyols are essential building blocks for the manufacturing of polyurethanes, polyetheresters and polyetheramides.

With our sustainable methodology, **bio-based polyols** that meet different application and processing needs can be produced.

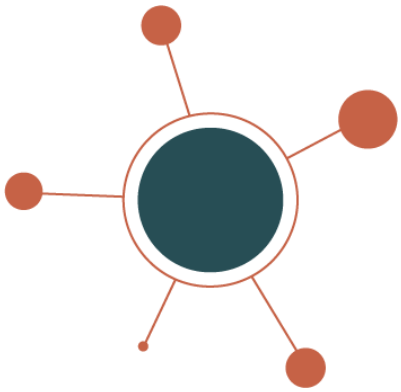

www.polykey.eu

Available molecular weights range: 500-2000 g mol^{-1}

WO2019215373A2

01

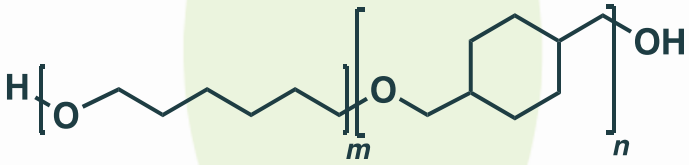

BIO-BASED POLYOLS

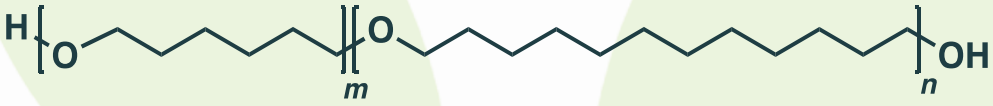

You do not find optimal properties for your application in our catalog?

We can provide you copolyethers on demand. Combining different monomers in the appropriate ratio, hydroxyl number, hydrophilicity or thermal properties can be tuned.

Examples of synthesis previously performed

PK 01-05

PK 01-04

Available molecular weights range: 500-2000 g mol^{-1}

WO2019215373A2

Please contact us to
discuss your requirements.
